

JANNY MT

Flexible Installations of Controlled Atmosphere Units

« Janny MT preservation »

Cauliflower

Cauliflower

- Storing during production peaks
- Maintaining the sanitary and gustative quality
- Maintaining colour and firmness
- Avoiding weight loss (less than 1% after 45 d)
- Minimize losses during long storage

Picking recommendations

- Match maturity to the desired preservation time
- Pick extremely healthy products
- Do not store products after rain
- **Favour small calibres**

Key figures

1. Use Janny MT module 610 - 6
2. Fill module with **150 kg loose**
3. Put in cold storage at **+0°C**
4. **Wait until the products are cooled to heart**
5. Close the lid
6. Check gas stabilisation
7. Possible preservation up to **45 days**
8. Open modules
9. Let the module **12 hours with open lid in cold room for rehabilitation**

6 Open membranes
0 Cap on

Varieties:

	Temperature	O ₂ rate	CO ₂ rate	Preservation time
Classic Cold	+0°C	21 %	0 %	21 d
Janny MT CA	+0°C	1 to 5 %	1 to 5 %	45 d
